

PRESS RELEASE

"From Tadpole to Prince: Towards Mega Conscious Awareness in 2016" helps the reader to return to a Metaphysical World. It explains how we became tempted and let astray. It shows the transformation that is especially now necessary as we proceed in the intersection between two vicious circles. Whether you at the end of this intersection start another repetition or continue, depends on your development. Important is to have a lot of your own energy (your own identity) merged and release all other energy in you.

The uniqueness of the book is that it describes a period of approximately 50,000 years, creating prospect of repeating patterns. It seems that humanity remains with their back to the future and their face to the past. This brings mankind not any further. It allows some to repeat and wallow in ever thicker layers in order to keeping up appearances. Thus they increasingly become disconnected from their inner Self and the purpose of life. However, other individuals know how to follow the path of life by facing the facts of life and perceive reality. Each person perceives from the intuitive ability. This ability allows communicating with the Self. This ability is inaccessible to many persons, leaving only their outer layer to experience something.

This book describes the repeating pattern as well as the development stages that make it easy and motivating to continue on your path and refrain from repetition.

The development stages are described from the perspective of Social Behavior, Awareness level, Carl Rogers, Erik Erikson, Maslow, level of incarnation in the body and colors.
