

PRESS RELEASE

“*Your Choice: Living Alive or Living Dead*” is all about people who focus on money, control, power and extremely extrovert behavior which make them in fact Living Dead.

Without realizing it people have started to hate themselves and others resulting in an increased focus on visible display. This increased focus on visible display contributes severely to the down turn of men and society. Instrumental is the idea of a “makeable society” which contributes to the mental and physical degeneration of men.

The book “*Your Choice*” shows how one can consciously choose to embrace Life by living. Hence, creating a balanced society with full knowledge of Life itself. Resulting in stopping the negative spiral of degeneration, greed and power with the ultimate possibility of extermination. Instead, by making the “right choice” one has the possibility of evolving into the future.

This book presents insights to support the reader to make the right choice “Your Choice”. Pauline Laumans discusses today’s essential questions on Life from multiple angles to provide the reader with all necessary information to make a sound judgment what choice(s) are relevant for Living Alive.
